# Automotive Locksmith Services

**Lost your car keys? Locked out? Need a spare? We’re here to help.**

## Welcome

At HBL Security Solution, trading as Herne Bay Locks, we know how frustrating it can be when something goes wrong with your car keys or locks. Whether you’ve lost your only key, locked yourself out or have a key that’s stopped working, our automotive locksmiths can help. We offer a mobile service for a wide range of cars and vans, often saving the inconvenience of recovery to a dealership.

## Lost All Your Car Keys?

Losing your only car key can leave you stranded, but getting a replacement may be easier than you think. In many cases, HBL can come to your vehicle, supply and program a new key and help get you back on the road.

## Why Wait Until You’ve Lost Your Last Key?

Having a spare car key can save you time, money and stress. Whether you need a standard car key, remote key or smart key, HBL can supply and program suitable replacements for many makes and models.

## Worried Someone Has Your Lost Keys?

If your keys have been lost or stolen, we may be able to remove them from your vehicle’s system so they can no longer start the engine. Depending on the vehicle, additional work may be needed to prevent the missing key from unlocking the doors.

# Locked Out & Key Problems

**Practical help when your car keys or locks let you down.**

## Locked Your Keys Inside Your Car?

Our mobile automotive locksmiths can help you regain access using specialist methods designed to protect your vehicle. We aim to open vehicles without damaging their locks. Destructive work would only be considered if a lock has completely failed and no suitable non-destructive option is available; we would explain the proposed work first.

## Broken Key or Damaged Lock?

A broken key stuck in your door or ignition can quickly become a major inconvenience. HBL can remove broken keys and repair or replace damaged vehicle locks and ignition barrels where appropriate.

## Car Key Stopped Working?

If your remote buttons have stopped responding, your key works intermittently or your vehicle won’t recognise it, the problem may not be as simple as a flat battery. We can investigate key and locking problems, repair damaged keys where practical and recommend a suitable solution.
