

## Smart Locks

At HBL Security Solutions, we believe smart locking is the future of home and business security.

We offer two leading solutions. The iLOQ system is battery-free, leveraging digital keys or smartphones with no maintenance. It's highly secure, fully encrypted, and leaves an audit trail—perfect for high-security environments.

The Dorex system is battery-operated, offering keyless access via an app, PIN, or key—it's easy to install and manage and supports up to 200 users. Whether it's a home or a commercial space, we bring you flexible smart key technology that's tailored and secure—future-proofing your access control. Let us unlock that peace of mind!

Combining security and flexibility, a Smart Lock might just be the answer, call us to find out more.
