

# Commercial Security

## Master Key Systems

In schools, care homes, and multi-tenant properties, different people need access to shared areas while keeping private spaces secure.

A master key system gives staff, residents, or tenants access only where needed, while management retains full control. We design and install systems using trusted high-security brands like DOM and Mul-T-Lock—delivering simple, reliable access without the complexity of electronic systems.

## Access Control & Smart Locks

When managing physical keys becomes a risk or inconvenience, access control puts you back in control. Using trusted systems like Hikvision and Paxton, you can monitor access with live audit trails and add or remove users instantly—no more lost keys or reissuing locks.

# Commercial Security

## Access Control & Smart Locks

For areas where power isn't available, such as gates or outbuildings, we integrate smart lock solutions from iLOQ and Dorex—giving you flexible, keyless security across your entire site. For more details, see our dedicated smart locks brochure.

## CCTV Solutions

Stay connected to your property at all times with reliable CCTV systems from trusted brands like Hikvision and HiLook.

Whether it's a single-camera or multi-camera setup, we provide professional installation and seamless integration. With mobile app access, you can monitor your property from anywhere in the world, 24/7—giving you complete visibility and peace of mind.

We have multiple security solutions, something for every circumstance and budget.

Just give us a call to see how we can help.
